

Appendix 2

**Form for declaration of cancellation
Need emergency care in daycare and school**

General

A right to emergency care is only granted within a very restrictive framework so that the closure of facilities prevents or delays the development of infection chains. If the prerequisite for emergency care is not met, the child will not be admitted.

Emergency care is only an option if

Both persons with legal guardianship or the sole persons with legal guardianship or, in the case of handling arrangements, the person currently authorized to use the child guardians in areas of critical infrastructure (see Appendix 1) and who are prevented from looking after the child for business or operational reasons. There is also a right to emergency care if **only one** of the persons entitled to custody (or in the case of handling regulations) is active in the healthcare system, in the area of outpatient or inpatient care or in the police enforcement service and for childcare reasons for business and operational reasons is hindered.

The prerequisite for emergency care is that the children and their legal guardians

1. have no symptoms of Covid-19 disease, and
2. have not been in contact with a person infected with SARS-CoV-2 or 14 days have passed since contact with a person infected with SARS-CoV-2 and they have no symptoms of the disease Covid-19, and
3. have not been in an area that the Robert Koch Institute identified as a risk area for infection with the SARS-CoV-2 pathogen at the time of the stay, or was identified as such within 14 days after or since returning from 14 days have passed in this risk area and they show no symptoms of Covid-19 disease.
